

# Flying Report

news and comment

**CRAFT-AIR, INC.**, 20115 Nordhoff St., Chatsworth, CA 91311, has just introduced the Drifter II, a new Tom Williams design. Drifter II is a competition sailplane. The kit comes complete with all hardware — everything the modeler will need, except glue, covering and radio. This deluxe kit features machined parts, top quality wood, I-beam wing spar, fuselage reinforced with plywood and triangle stock longerons, control rods, horns, clevises, hinges, a tow hook, even servo mounting material. The drawing and instructions include plans for a power pod (.049). Drifter II can be built with a 6-foot wing span, or, at the builder's option, a 2-meter wing span. The plans include instructions for the 2-meter modification, and a material list, but material is not included. This deluxe kit, which will thrill the competition pilot and beginner alike, carries an unbelievably low suggested retail price of only \$19.95.

## AMA election results

The Academy of Model Aeronautics announced the election results for the office of president and five of its eleven U.S. district representatives.

Earl Witt, formerly Secretary-Treasurer for the Academy, was elected president carrying the majority vote in ten of the eleven districts.

New district representatives (Vice-Presidents) were elected in four of the five districts holding elections this year. They are as follows: representing New Jersey and New York is John Grigg; representing Delaware, D.C., Maryland, North Carolina, and Virginia is Chuck Foreman; representing Illinois, Indiana, Kentucky and Missouri is Horrace Cain; representing Arkansas, Louisiana, New Mexico, Oklahoma, and Texas is John Embry; and re-elected for representative of Arizona, California, Hawaii, Nevada, and Utah is James Scarborough.

New council members elected begin their two-year term of office in January of 1979.

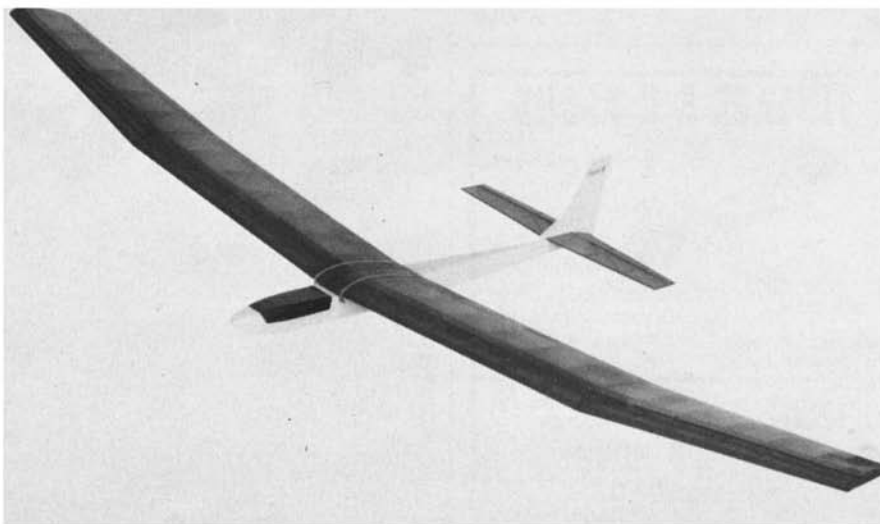

## New Canadian R/C airplane frequencies

The Canadian Air Ministry has approved four new frequencies for R/C use in Canada effective September 26, 1978. The chart below indicates the legal 72 MHz R/C channels for both the US and Canada as well as the four new Canadian frequencies. Canadian flyers who fly in the US must do so under the supervision of a licensed US R/C flyer or they must obtain a US license of their own. In either event US FCC rules prevail, therefore the four new frequencies cannot be used in the US—BOB ABERLE.

US	Canadian	Colors
*72.080	*72.080	white/brown
72.160	72.160	white/blue
*72.240	*72.240	white/red
72.320	72.320	white/violet
*72.400	*72.400	white/red
—	*72.720+	
—	*72.760+	colors to be determined
—	*72.800+	
—	*72.840+	
72.960	72.960	white/yellow
*75.640	*75.640	white/green
